

SERS Energy Solutions Ltd are Established in 1990 as an external wall insulation (EWI) and render company based in South Wales, SERS has grown and developed into a national specialist (offices in England, Scotland and Wales) in the design, supply and installation of EWI and façade solutions. SERS also offer a substantial repair solution for installs completed by other contractors, and a maintenance solution for installs completed by ourselves.

Bron Afon Community Housing

Elena Ramona Mocioaca joined SERS in March 2017 and was keen to develop her skills in the workplace Elena registered with Skills for Industry in August 2017, supported by her employers SERS Energy Solutions Ltd, to take forward a Level 3 NVQ Diploma in Occupational Work Supervision (Construction). The Skills for Industry project offers an On Site Attendance Training (OSAT) model and Elena has embraced the flexible training completing the qualification early January 2018.

Elena has been working with Social Housing projects and as part of her role, she liaises with the tenants and attends site management meetings, Elena is involved with various construction works including fitting, insulation products, new roofing, plastering and plumbing. Elena has adapted well to technology and has utilised the various methods to deliver a quality portfolio detailing her progression on the NVQ level 3 Occupational Work Supervision (Construction) qualification. Elena is the first woman to complete the L3 OWS construction qualification with the Skills for Industry project raising the profile of women in a predominantly male construction industry.
