

Smiths' Carpentry Ltd is a family run business that has been in existence since 2006. They specialise in Timber Frame construction, complex roof structures, CLT, gluelam beams and passivhaus units.

As 1 of just 14 timber frame erecting companies to have been chosen for the **Structural Timber Association mentoring programme**, Smith's Carpentry believe in continuous training and upskilling for all their staff, and Coleg Sir Gar's Skills for Industry Project has worked closely with Smith's Carpentry since 2013 until the present day. The Skills for Industry Business Engagement Officers discuss training needs and develop plans ensuring delivery of a quality upskilling programme.

*'To date Smith's Carpentry Ltd have erected 14 Premier Inns all over the UK. Our teams are fast when erecting these structures but we do not compromise on quality.....We have successfully completed commercial builds from hotels, restaurants and even a pilot Glulam structure for a new build Lidl in Dublin!*

*'Our dedicated team leaders are aware of the quality of workmanship we expect and are always accountable for ensuring they deliver quality work. We believe in employing and training the right staff to ensure a quality service every time.'*

To date the Skills for Industry project has successfully enrolled 21 of Smith's Carpentry's employees and subcontractors onto subsidised OSAT Timber Frame and Steel Frame qualifications and are pleased to support and assist Smith's Carpentry with their continuous future development.
